

Tamdeed Projects with its Visionary Head Management, Project Management System, capabilities, experience, knowledge and the skilful workforce has transcended all the expectations. Its Human Capital investment includes more than 40 Engineers, 250 Head Technicians and 2000 certified staff altogether struggling day and night to complete the UAE project within its downtime frame.

Tamdeed Projects' administrative and technical teams are supported by pre-qualified Contractors capable of simultaneously working at different locations to give the required planned progress. These contractors are reliable and execute works to the specification without deviations as they have been working with Tamdeed for long time.

Whereas, we have a considerable number of capable sub-contractors established and existing in some GCC Countries like Qatar and Saudi Arabia ready to support us in our future projects.
